# INTRODUCTORY.

DENVER DIRECTORY OFFICE,
June 1, 1901.

Again we greet the public; this time with the Twenty-ninth Annual Volume of the Denver City Directory, which has little in outward appearance to distinguish it from that of the previous year; but a careful examination of its contents will reveal many changes since our last issue, such as annually occur in all important commercial centers.

Very few, if any, of those who find the Directory so useful, have any conception of the arduous task of collecting and arranging the matter intelligibly, and the amount of labor and constant care required to produce such a work—one from which the citizen or stranger, by referring to its pages, can readily find information of importance connected with the city. The work and data contained in this volume are of vital importance to the public and the publishers have endeavored to make the facts accurate and complete. Elaborate and expensive preparations, together with a thorough knowledge of every locality within and adjacent to the city, are necessary for the successful publication of a Directory of a city like Denver. A properly prepared Directory is far more than a catalogue of names, addresses and occupations of citizens. It is a historic record, in detail, of a city's progress, and is frequently used by those contemplating removal or making investments in a strange city for the purpose of satisfying themselves as to the measure of prosperity such city enjoys, and what the future is likely to develop for it.

We are pleased to note the rapid strides we are making in growth, both in population and in the building up of a city whose beauty, commercial importance and healthful climate is acknowledged universally.

This volume contains 76,560 names, which is an increase of 5,364 names over the year 1900, a fact on which we congratulate our citizens.

To our patrons, private citizens and the press who have cordially received us during so many years, we return our sincere thanks.

THE PUBLISHERS.

# The Physiological School of Denver

CONDUCTED BY
MRS. KATHARINE WESTENDORF, 514-515 Kittredge Bldg.

A Physical Training School for the Development, Culture and Correction of

THE BODY, THE VOCAL AND SPEECH ORGANS

The school affords a comprehensive and thorough system of training, based upon correct physiological principles and designed to secure the most healthy and economic action of the organism in general, and of those parts connected with breathing, voice and speech in particular.

**SPECIALTIES:**—The correcting of all forms of **Speech Defects** and impediments in children and adults. The development and instruction of **Backward Children,** whether physical or mental. **Spinal Curvature** and other maldevelopments corrected. **Laryngeal** and **Pulmonic Weakness** treated by a system of skillful exercises. The school is for pupils of either sex; for children as well as adults, including elderly men and women. Pupils received at all times. Tuition private or in class. For circulars and terms apply to

## Some Reason Why Names Are Not Found in the Directory.

Many persons fail to find names on account of not knowing where to look for them. A slight variation in spelling will place names almost exactly alike far apart. For instance—such names as Brown, Browne, Braun—though pronounced the same, and really the same name, are found in different places in the Directory. So, also, of Conner, Connor, Connors, O'Connor, and many others. Each has its own place.

The pronunciation of foreign names usually varies from the pronunciation of such names in English. For instance, if an Irishman pronounces his name Agan, it is probably spelled Eagan or Egan. So, Mar, spelled Meagher, or Mahr; Fay, spelled Fahy, etc.

In German names ei and ai are pronounced like î, ie like ê, au like ow, eu like oi; j is pronounced like y, w nearly like v, dt and th like t, etc. Thus a name which is pronounced Yack may be spelled Jack; Young, Jonge; Roiter, Reuter; Keefer, Kiefer; Line, Lein; and they must be looked for as spelled, not as pronounced.

The letters ä, ö, ü, in a German name, are equivalent to ae, oe, ue, and the name *should be looked for* as if the e appeared.

Owing to the difficulty which foreigners find in getting their names properly pronounced by the Americans with whom they come in contact, they frequently make very decided changes in them, taking sometimes an English name which sounds similar to theirs—as Gilbert for Gebhardt, Rice for Reis, Cole for Kohl, etc.; sometimes translating their names, as Blanc changed to White, Stein to Stone, etc.

Sometimes members of the same family spell their names in two or three different ways: As Ballantyne, Ballantine, Ballintine; sometimes men bear two or three names, being known by one in their family, another in the shop, and perhaps still another among their associates.

To find a name, *you must know how to spell it.*

BALLENGER & RICHARDS

# STREET AND AVENUE GUIDE

TO THE

# CITY OF DENVER.

---

Entered according to act of Congress in the year 1891 by
BALLENGER & RICHARDS,
In the office of the Librarian of Congress, at Washington.

# EXPLANATION TO STREET GUIDE.

It will be noticed that in this Street Guide the names of the streets are mentioned in alphabetical order, giving the course in which they run, as near as possible, to all points of the compass, and enumerating all streets which cross the same in the order in which they occur, except on such streets as are crossed by numeral streets or avenues exclusively.

The decimal system of numbering being adopted, one hundred numbers are assigned to each square, giving one number to each twelve and one-half feet, or two numbers to each lot of twenty-five feet, beginning at the Platte River on the west at 0, and 100 at First street, increasing northeasterly on Larimer and all streets running parallel.

Streets crossing Larimer are numbered from Broadway increasing northwesterly. On Broadway and on streets running parallel with same the numbers increase northward and southward from Ellsworth at 0. Streets and avenues crossing Broadway are numbered east and west from Broadway at 0, prefixing the word East or West to that portion of the street or avenue east or west of Broadway, as follows: East Twelfth avenue would apply to that part of Twelfth Avenue east of Broadway, and West Twelfth avenue to that part of Twelfth avenue west of Broadway.

On the numeral avenues from East Twentieth avenue to East Twenty-sixth avenue the numbers increase easterly from Washington avenue at 0, and from East Twenty-sixth avenue to East Thirty-eighth avenue the numbering begins with 0, at Downing avenue. West numeral avenues run parallel with West Colfax avenue and from West Sixteenth avenue north to West Fifty-second avenue are located north and west of the Platte River.

For convenience in locating the streets and avenues, we have used the most prominent streets, avenues, boulevards and the Platte River as locating points.

# STREETS AND AVENUES.

**ADAMS,** thirty-third east of Broadway, numbered north from East Ellsworth at 0, crossed by numeral avenues to East Seventeenth av and from East Twenty-sixth av to northern limits

**AGATE,** continuation of West Twenty-third av, from Sloan's Lake west
